

# Malaria deaths in Africa:2000-2014

## I. The highest countries for malaria deaths in Africa

We notice in these pictures that deaths are increasing in cities that are located almost in the middle of the African continent. We see that deaths from malaria are concentrated in four of the countries

Kenya ranked first in terms of deaths due to malaria, with 27,896 deaths per day from 2000 to 2014. This information was concluded by looking at the interactive map where it wrote "Darker shading makes a high number of deaths caused by malaria "

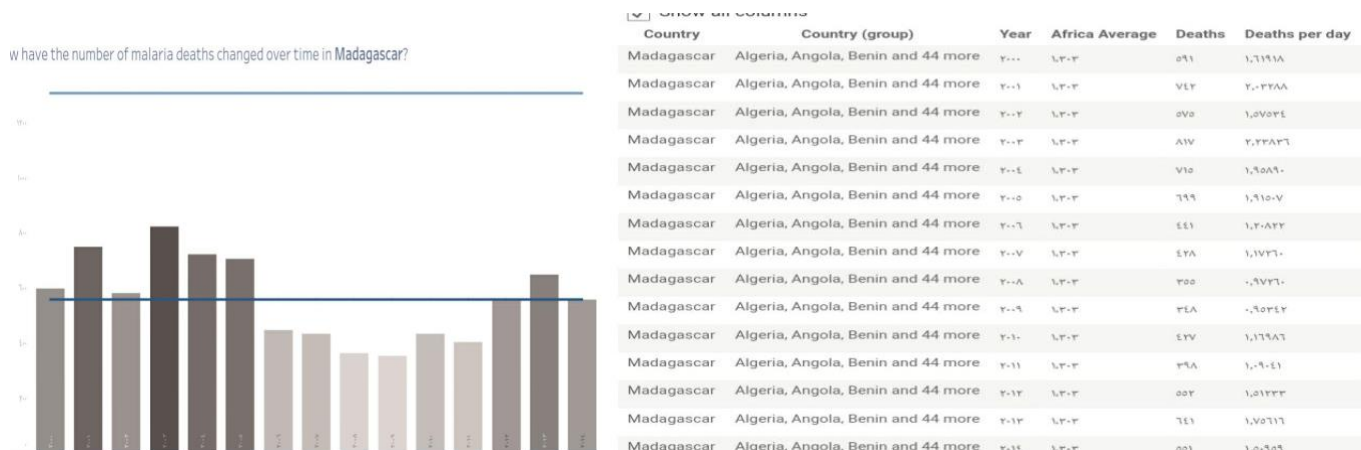

## II. Analysis of the number of deaths due to malaria in Madagascar

The proportion of delegations in Madagascar is about 0.365% of the total number of delegations in Africa in 2000

In 2007 the proportion did not change much, as it amounted to 0.365% of the total death rate

In 2014 the ratio was approximately 0.3649%

We also note that the mortality rate in **Madagascar** fluctuates from year to year. I extracted this information by clicking on the island of Madagascar in the map, then clicking on the "view data" icon, then pressing "full data" icon, then “show all columns”

### III. The start of monitoring deaths in Mauritania

In Mauritania, it is clear that the situation has not improved since 2000 to 2005. Until 2006, 67 deaths were recorded, And the proportion continued to increase until it stopped in 2008. Then the ratio started to fluctuate until 2014
